

CASE STUDY – Cost Effective Effluent Tank

Location: Waste Water Treatment Plant
New South Wales

The tank construction was a TS600 model with an Open Top. It is being utilised for the purpose of Waste Water Storage as it was very cost effective for Paringa. This was a remote site, our tanks were very cost effective and with on-site construction of 3 days shortened lead times were met.

Tank Dimensions: 10.5m x 5.3m high.

Effective capacity: 425kL
