

## CASE STUDY – Architecturally Appealing

Location: Villawood  
New South Wales

The tank construction was of a standard TS600 model. The finishing on the tank was custom tailored to the client's requirements for aesthetic purposes. It was powder coated to match the building exterior and resulted in an impressive finish as shown in the photo.

Tank Dimensions: 8.2m x 8.2m high.

Effective capacity: 385kL

*Photo Above:*  
Completed tank constructed to fit into building's pre-existing structure.

*Photo Right:*
