Hi Peter,

Savills would like to take the opportunity to thank Tasman Tanks for the works that were commenced at Dynons Plaza, 905 Hay Street, Perth.

This job seemed to be straight forward, replacing bolts and cleaning the tanks, but unfortunately David and his team member encountered many different issues once the works were commenced.

We found David whilst on site to be extremely pleasant to deal with and efficient to carry out the project from start to finish, while the building is fully tenanted.

I would like to thank Peter and David for giving us the pleasure to work alongside Tasman Tanks and we would certainly like to continue/recommend any potential works in the future with Tasman Tanks.

Kind Regards

Steven Pringle
